Dear colleagues,

It is a great pleasure to welcome you to “The Osteon Ortho & Spine Course” 1st Annual Hands-on Cadaveric Course that will take place in Athens ATTC on 15&16 September 2023.

Orthopedics, as well as Spine surgery, has evolved impressively over the last few years and decade to accommodate patients’ and healthcare stakeholders’ needs for more efficient and less disruptive interventions. That led Minimally Invasive Surgery to become the standard of care, hence this course will emphasize this specific field, but it will also include the essential surgical knowledge and techniques of surgeons’ everyday practice.

The scientific program is structured to include sort-focused lectures, case-based discussions, and -of course- hands-on practice on cadavers. The faculty consists of esteemed fellowship-trained colleagues both from Greece and abroad.

We will endeavor to deliver a high quality educational hands-on course for fellows and early carrier surgeons. Orthopedic-orientated colleagues will have the opportunity to attend both the Upper and Lower Limb theoretical sessions but will have to choose between them for the cadaveric sessions. Spine Surgeons and Neurosurgeons will attend the spine surgery sessions running in parallel.

We look forward to fulfilling your expectations for a well-spent portion of your valuable time.
